## TO WHOM IT CONCERNS

Dr. Jarosław Konior has worked on the McCain Project in Strzelin from March 1998 to final completion end of April 1999. During this period Dr. Konior has assisted me as Project Manager in a number of functions ranging from contractor prequalification, tender package development, tender evaluation, contract negotiations, and other project engineering functions.

One of Dr. Konior responsibilities was to implement our Document Control System and maintain supervisory responsibility for the document control function throughout the project.

Dr. Konior has contributed strongly to the PM Project Team not only technically but with good interpersonal skills which are vital to a large project team.

We would certainly be interested in retaining Dr. Konior if we undertook another project in this region and would recommend him to other potential employers.

To whom it may concern

Jarek Konior was one of the first Polish PM Group employees and has been an important person in the organisation over the last 15 years.

Jarek was instrumental in developing PM Group Polska from a single office into the pre-eminent multi-office multi-disciplinary Architectural and Engineering firm in Poland employing over 200 staff.

**The project delivery specialists**

Over the years Jarek has held a number of positions from Project Manager, Design Office Manager, Director of Consultancy, and Director of Engineering. In recognition of his contribution he was appointed to the PM Group Polska Board in 2007.

Jarek started his engineering and project management activities by implementing the PM Group Quality Management System into the Polish Organisation and successfully led PM Group Polska in obtaining ISO 9001:2008 certification for Engineering, Consultancy and Project & Construction Management services to be delivered from the Wroclaw and Warsaw offices.

Throughout his creative work for PM Group Polska Jarek established and developed new technical consultancy services like Feasibility Studies, Due Diligence, Bank Investment Supervision, Tenancy Management, Technical Audits and Aviation Consultancy.

More recently he played a leading role by converting PM Polska Architectural and Engineering services from 2D AutoCad into 3D BIM Revit as well as contributing to the development of Multi Office Execution capability across the PM Group.

Jarek has identified, recruited, introduced, developed and coached a number graduates and young engineers, all of whom contribute to the strength of PM Polska today.

We would like to confirm Jarek's dedication, devotion and his immense contribution to PM Group and we are pleased to recommend his exceptional skills and solid competence for any potential business engineering partners.
